RADIOACTIVE MATERIAL LICENSE

Pursuant to the Texas Radiation Control Act and Texas Health Department regulations on radiation, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess and transfer radioactive material listed below; and to use such radioactive material for the purpose(s) and at the place(s) designated below. This license is subject to all applicable rules, regulations and orders of the Texas Department of Health (Agency) now or hereafter in effect and to any conditions specified below.

LICENSEE			This license amendment is issued in response to a letter Dated: December 10, 2002 Signed By: Franklin Anderson
1. Name	ZACHRY CONSTRUCTION CORPORATION ATTN FRANKLIN D ANDERSON		3. License Number L01995
2. Address	P O BOX 240130 SAN ANTONIO TX 78224-0130		
			Amendment Number 22
PREVIOUS AMENDMENTS ARE VOID			
			4. Expiration Date December 31, 2003
RADIOACTIVE MATERIAL AUTHORIZED			
5. Radioisotope	6. Form of Material	7. Maximum Activity*	8. Authorized Use
A. Cs-137	A. Sealed source (A/S Model CDCW556; IP Model HEG-137)	A. No single source to exceed 9 mCi	A. Soil testing using Troxler Electronics Laboratories (TEL) Model 3400 series moisture/density gauge.
B. Am-241	B. Sealed source (A/S Model AMNV.997; IP Models 3021 or 3027)	B. No single source to exceed 44 mCi	B. Soil testing using TEL Model 3400 series moisture/density gauge.
C. Cs-137	C. Sealed source (CPN Model CPN- 131)	C. No single source to exceed 10 mCi	C. Density measurement using Boart Longyear (CPN) Model MC Series moisture/density gauge.
D. Am-241	D. Sealed source (CPN Model CPN- 131)	D. No single source to exceed 50 mCi	D. Moisture measurement using CPN Model MC Series moisture/density gauge.
E. Am-241	E. Sealed source (A/S Models AMNV.340 or AMNV.339)	E. No single source to exceed 300 mCi	E. Asphalt testing using TEL Model 3241 asphalt content gauge.

* Ci-Curies mCi-Millicuries μCi-Microcuries

9. Radioactive material shall only be stored at:

Site Number
000

Location
San Antonio - 527 Logwood

RADIOACTIVE MATERIAL LICENSE

LICENSE NUMBER	AMENDMENT NUMBER
L01995	22

10. The authorized place of use is at temporary sites, in areas not under exclusive Federal jurisdiction, throughout Texas.
11. Each site shall maintain documents and records pertinent to the operations at that site. Copies of all documents and records required by this license shall be maintained for Agency review at Site 000.
12. Radioactive material shall not be stored or used at a permanent site unless that site is specifically authorized on this license. A site is considered permanent if radioactive material is stored and/or used at that location for more than 90 days in any twelve month period.
13. The individual designated to perform the functions of Radiation Safety Officer (RSO) for activities covered by this license is Franklin D. Anderson.
14. The licensee shall comply with the provisions (as amended) of Title 25 Texas Administrative Code (TAC) §289.201, §289.202, §289.203, §289.204, §289.205, §289.251, §289.252 and §289.257.
15. Radioactive material shall be used by, or under the direct supervision of, individuals designated by the RSO only after each worker has successfully completed a training course determined by the Agency as appropriate. Documentation verifying the successful completion of the training for each worker shall be maintained by the licensee for inspection by the Agency.
16. The licensee shall not remove the source rod mechanism from their respective moisture/density gauge.
17. Sealed sources containing radioactive material shall not be opened or removed from their respective source holders.
18. The licensee shall conduct a physical inventory, at least every six months, to account for all sealed sources received and possessed under the license. The records of the inventories shall be maintained for inspection by the Agency for three years from the date of the inventory and shall include the radionuclide, number of curies, location of each source of radiation, the name of the individual making the inventory, and the date of the inventory.
19. The licensee shall conduct, at intervals not to exceed six months, a program of visual inspection and maintenance of all source holders. This inspection shall include, but not be limited to, proper labeling of the source holder, proper functioning of the "on-off" mechanism, if any, and integrity of the shielding and source mounting mechanism. If any inspection reveals that labeling is inadequate, the "on-off" mechanism is not functioning properly, source shielding is inadequate or the source mounting mechanism is inadequate; the licensee shall remove the device containing radioactive material from service until repairs have corrected the deficiency. A record of each inspection and the date performed shall be maintained for inspection by the Agency for three years.
20. Leak testing of all cesium-137 sources shall be performed by preparing the wipe as indicated by procedures submitted with application dated December 15, 1993 then wiping the metal wiper ring and exposed portion of the sliding tungsten shield. The source rod mechanism shall not be positioned in the direct transmission position for leak testing purposes.

RADIOACTIVE MATERIAL LICENSE

LICENSE NUMBER	AMENDMENT NUMBER
L01995	22

21. Maintenance of devices containing radioactive material, including those generally licensed, possessed and used by the licensee and repair and maintenance (e.g., replacement of labels, rust and corrosion prevention) of source holder mounting brackets shall be performed by or under the supervision of the RSO.
22. Repair of shutter mechanisms or shielding of devices containing radioactive material, including those generally licensed, and the installation, replacement and disposal of sealed sources used in devices shall be performed only by the device manufacturer or other persons specifically authorized to perform such services by the Agency, the Commission, another Agreement State, or a Licensing State.
23. In addition to the possession limits in Condition 7, the licensee shall further restrict the possession of licensed material to quantities below the limit specified in 25 TAC §289.252(gg)(4)(C) for establishing decommissioning financial assurance.
24. Except as specifically provided otherwise by this license, the licensee shall possess and use the radioactive material authorized by this license in accordance with statements, representations, and procedures contained in the following:

application dated December 15, 1993, and
 letters dated November 19, 1993, December 19, 1994 and January 3, 1995, December 18, 1996,
 July 29, 1997, November 23, 1998, December 1, 1998, January 28, 1999
 December 5, 2000 and **January 17, 2003.**

Title 25 TAC §289 shall prevail over statements contained in the above documents unless such statements are more restrictive than the regulations.
